Read Free 1hd Fte Engine Ih8mud Forum Forum The cost of repairing a fuel pump on the 1HD FT and 1HD FTE has been a lot higher than the rebuild cost of a 1HD T pump. A plus for the 1HD FT, is that the BEB problem seemed to have been more or less sorted out by the time of its introduction (but still occurring). 1hd Fte Engine Ih8mud Forum - Page 8/20

The 1HD-FT and the 1HD-FTE are basically the same engine but the 'E' means electronic fuel injection. So the fuel injection system is controlled electronically I heard that you cannot buy a FTE and then ditch the electronics without getting an FT injector pump and the timing cover/housing or whatever it all bolts to, you also need the FT injectors as they run less pressure than the FTE.

### **My 1HD-FT Conversion - Offroad 80's**

Compared to the 1HD-FT, the length of the exhaust valve was extended so that the valve in its fully closed state was positioned close to the piston to reduce the unnecessary amount of space in the combustion chamber - this improved combustion efficiency For the 1HD-FTE engine, valve overlap was 24 degrees, intake duration was 216 degrees and exhaust duration 246 degrees (see table below).

But the 1HD-FTE, which is a bigger 6 cylinder engine has a noticeable lack of torque below the 2K mark. Is there any reason for this ? The lack of torque is less noticeable on automatic gearboxes because the TC multiplies torque, and it works above 1800-2000 RPM almost all the time.

Just read this. Don't know why you would waste your money on a 1HD-T if you are going into the cost of a conversion. Go for a 1HD-FT or better yet the 1HD-FTE. As confirmed the T & FT was 80 series only. The FTE was 79 and 100 series. The head is the same one on FT and FTE, they just have different rocker covers for the different inlet piping.
