So the centripetal force does no work. 3. The normal force can do work on an object if the normal force has a component in the direction of displacement of an object. If someone were to jump up in the air, then the floor pushing upward on the person (the normal force) would do positive work and increase the person's kinetic energy.

CHAPTER 6: Work and Energy Answers to Questions

Polarization Force The figure shows a positively charged rod near a neutral piece of metal. Because the electric force decreases with distance, the attractive force on the electrons at the top surface is slightly greater than the repulsive force on the ions at the bottom. The net force toward the charged rod is called a polarization force.
