### Concept of Physics Part-1 2019-2020 Session by H.C Verma ...

This result can be understood more simply by considering the torque as arising from a force of constant magnitude  $F$ , being applied perpendicularly to a lever arm at a distance  $r$ , as shown in the figure. This force will act through the distance along the circular arc  $s = r\phi$ , so the work done is  $W = F s = F r \phi$ . Introduce the torque  $\tau = Fr$ , to obtain  $W = \tau \phi$ , as presented above.
