Responsive Web Design Overview For

A responsive web design will automatically adjust for different screen sizes and viewports. What is Responsive Web Design? Responsive Web Design is about using HTML and CSS to automatically resize, hide, shrink, or enlarge, a website, to make it look good on all devices (desktops, tablets, and phones):

HTML Responsive Web Design - W3Schools

In Responsive Web Design, the layout of the page adapts depending on the screen size and orientation of the device where it's viewed. Elements are reorganized as viewports grow or shrink. Using flexible grids, the content automatically adjusts to multiple displays and devices. A design for desktop might use three columns for its layout, and then be reorganized to use two columns for tablets, and a single column for phones.
