The Hidden Connections: A Science for... book by Fritjof Capra

The Hidden Connections: A Science for Sustainable Living by Fritjof Capra (Random House: New York, 2002) This book is about creating learning communities, but that is not it's topic. Its topic is networking, or in Capra's words "connections." It's a comprehensive review of all cosmic networks that make up "life, mind, and society."

Book Review: The Hidden Connections, by Bill Ellis, 5/1/03

The Hidden Connections: A Science For Sustainable Living Reading Summary: The central theme of this reading is that organizations are living entities that express the emergence of novelty in fluid and creative ways along the channels of informal networks, at the same time functioning within formal, designed structures.

The Hidden Connections: A Science For Sustainable Living ...

While the Web of Life gives us an overview of the most recent developments in systems theory—chaos, complexity and self-organization—as applied, primarily, to biology, The Hidden Connections extends these ideas into the realm of human culture. The importance of understanding the recent breakthroughs in biological systems theory is that they explain how living systems are able to create and sustain themselves—how they manage energy so they can maintain their structures and activities ...

Book Review | The Hidden Connections

The Hidden Connections is a 2002 book by Fritjof Capra, in which the author proposes a holistic alternative to linear and reductionist world views. He aims to extend system dynamics and complexity theory to the social domain and presents "a conceptual framework that integrates life's biological, cognitive and social dimensions".

The Hidden Connections - Wikipedia

Fritjof Capra's "the hidden connections" is a book of ideas. Capra explains in detail a conceptual framework that integrates biological, cognitive and social dimensions of life which allows for a systematic evaluation to a series of important issues.

The Hidden connections: A Science for Sustainable Living ...

The hidden connections : A science for sustainable living. p. xix My extension of the systems approach to the social domain explicitly includes the material world. This is unusual, because traditionally social scientists have not been very interested in the world of matter. Our academic disciplines have been organized in such a way that the natural sciences deal with material structures while the social sciences deal with social structures, which are understood to be, essentially, rules of ...

[PDF] The hidden connections : A science for sustainable ...

The Hidden Connection continues Capra's thoughts on complexity and the interconnectedness of all living things. For such a work it is easier to quote from the author: "My objective in the volume has been to develop a conceptual framework that integrates the biological, cognitive and social dimensions of life; a framework that enable us to adopt a systemic approach to some of the critical issues of our time.

The Hidden Connections; A Science for Sustainable Living ...
